Kiran Academy | AI Awareness Quiz 2026

AI AWARENESS QUIZ - 60 QUESTIONS

One Word / One Sentence Answers

(All answers are current as of 27 Oct 2026)

Name: Sejal Rahangdale

Section A - AI Companies & Latest Models

1. ChatGPT is developed by which company?

Answer: OpenAI

2. Claude is developed by which AI company?

Answer: Anthropic

3. Gemini is developed by which company?

Answer: Google (Google DeepMind)

4. Llama models are developed by which company?

Answer: Meta

5. Grok is developed by which company?

Answer: xAI

6. Mistral AI is headquartered in which country?

Answer: France

7. What is the name of OpenAI's flagship GPT-6 frontier model?

Answer: GPT-6 Astra

8. Which OpenAI model is positioned as a lower-cost model with near-Astra intelligence for coding and professional work?

Answer: GPT-6.1 Sol (the upgraded GPT-6 Sol)

9. What is Anthropic's latest Haiku model called as of October 2026?

Answer: Claude Haiku 5.5

10. What is Google's latest flagship Gemini model called as of October 2026?

Answer: Gemini 4 Argon

Section B - Generative AI & LLM Concepts

11. What does LLM stand for?

Answer: Large Language Model

12. What is Generative AI?
Answer: Generative AI is AI that creates new content such as text, images, audio, video and code.

13. What is a prompt in Generative AI?
Answer: A prompt is the instruction or input given to an AI model to generate a response.

14. What is a system prompt?
Answer: A system prompt is a high-priority instruction that defines the AI's role, behaviour and rules for the conversation.

15. What is an AI hallucination?
Answer: An AI hallucination is when a model confidently produces false or made-up information.

16. What is a token in an LLM?
Answer: A token is a small chunk of text (part of a word, a word, or punctuation) that an LLM processes.

17. What does context window mean?
Answer: The context window is the maximum number of tokens a model can read and remember at one time.

18. What is inference in AI?
Answer: Inference is using a trained AI model to generate an output for a new input.

19. What is fine-tuning?
Answer: Fine-tuning is further training a pre-trained model on specific data to adapt it to a task or domain.

20. What does multimodal AI mean?
Answer: Multimodal AI can understand and/or generate more than one type of data, such as text, images, audio and video.

Section C - Agents, RAG & Modern AI Development

21. What is an AI agent?
Answer: An AI agent is an AI system that can plan, use tools and take multi-step actions to complete a goal.

22. What is the main difference between a chatbot and an AI agent?

Answer: A chatbot mainly answers in conversation, while an AI agent can also plan, use tools and execute tasks.

23. What does RAG stand for?
Answer: Retrieval-Augmented Generation

24. Why is RAG used with LLMs?
Answer: RAG is used to ground LLM answers in retrieved external documents, making them more accurate and up to date.

25. What is an embedding?
Answer: An embedding is a numeric vector that represents the meaning of text (or other data) for similarity search.

26. What is a vector database used for in AI applications?
Answer: A vector database stores embeddings and quickly finds the most semantically similar content.

27. What does tool calling allow an AI model to do?
Answer: Tool calling lets a model call external functions or APIs to fetch data or perform actions.

28. What does MCP stand for in modern AI application development?
Answer: Model Context Protocol

29. What is an API key used for?
Answer: An API key is a secret credential used to authenticate and authorize access to an API.

30. What is meant by an agentic workflow?
Answer: An agentic workflow is a multi-step process where one or more AI agents plan, use tools, check results and iterate to finish a task.

Section D - AI Image, Video, Audio & Famous Tools

31. Midjourney is mainly famous for generating what type of content?
Answer: Images

32. Sora is primarily associated with which type of AI generation?
Answer: Text-to-video (video) generation

33. What is the name of OpenAI's current image-generation model family?
Answer: GPT-Image-2.5 (ChatGPT Images 2.5)

34. What does text-to-image mean?
Answer: Text-to-image means generating an image from a written text prompt.

35. What does text-to-video mean?
Answer: Text-to-video means generating a video from a written text prompt.

36. What does TTS stand for?
Answer: Text-to-Speech

37. What does STT stand for?
Answer: Speech-to-Text

38. What does OCR do?
Answer: OCR (Optical Character Recognition) extracts machine-readable text from images or scanned documents.

39. What is a vision-language model?
Answer: A vision-language model is an AI model that understands images and text together, such as answering questions about an image.

40. What is voice cloning in AI?
Answer: Voice cloning is using AI to replicate a person's voice so generated speech sounds like that person.

Section E - Coding AI, Hardware & Practical Awareness

41. GitHub Copilot is mainly used for what purpose?
Answer: AI-assisted coding (code completion and programming help inside the IDE)

42. Cursor is mainly used for what type of work?
Answer: AI-assisted software development (writing, editing and debugging code)

43. What is an AI coding assistant?
Answer: An AI coding assistant is a tool that helps developers write, complete, explain, debug and refactor code.

44. What hardware component is most commonly used to train large AI models?
Answer: GPU

45. What does GPU stand for?
Answer: Graphics Processing Unit

46. What does NPU stand for?

Answer: Neural Processing Unit

47. What is VRAM mainly used for during AI workloads?
Answer: VRAM stores the model weights and working data that the GPU needs during training or inference.

48. What does running an AI model locally mean?
Answer: Running a model locally means running it on your own device or server instead of using a cloud API.

49. What is an open-weight AI model?
Answer: An open-weight model is one whose trained weights are publicly released so anyone can download, run and fine-tune it.

50. What is model distillation?
Answer: Model distillation is training a smaller, cheaper model to imitate the behaviour of a larger model.

Section F - Latest AI Awareness & 2026 News

51. Which OpenAI model family includes Astra, Sol and Luna?
Answer: GPT-6

52. Which OpenAI GPT-6 model is designed for the most demanding frontier work?
Answer: GPT-6 Astra

53. Which Claude 5.5 model is positioned for complex agentic coding and knowledge work?
Answer: Claude Opus 5.5

54. Which Claude 5.5 model is designed for fast, high-volume and cost-sensitive work?
Answer: Claude Haiku 5.5

55. What is Google's Gemini 4 flagship model called?
Answer: Gemini 4 Argon

56. What is the name of OpenAI's current model family for advanced image generation and editing?
Answer: GPT-Image-2.5 (most capable model: GPT-Image-2.5 Sunburst)

57. What is the name of OpenAI's current realtime voice model family?
Answer: GPT-Live (GPT-Live-1; developer Realtime API line: GPT-Realtime-2.1)

58. Which company develops the Claude Opus, Sonnet and Haiku model families?
Answer: Anthropic

59. What AI safety risk occurs when malicious instructions are hidden inside external content and try to control the model?
Answer: Indirect prompt injection

60. Why should important medical, legal, financial or business information generated by AI be verified by a human?
Answer: Because AI can hallucinate or make errors, and wrong high-stakes advice can cause serious harm, loss or legal risk.
